BUY WITH CONFIDENCE

This year, as ever in our 80 years of growing experience, you can still buy with the assurance that we will furnish only TOP QUALITY TREES AND PLANTS. We have spared neither time nor expense in growing fine plants for you.

There's no priority on nature—you may buy all the plants and trees you need for profit and for the beauty that helps build morale in these trouble times.

Let us serve you here at our sales ground or send your order by mail.

A. R. Pickett and Son

NOTICE

Remember that we grow our own stock under the same climatic condition and in soil similar to yours. All stock is always carefully dug to preserve all the roots so you know it can grow.

While we guarantee to furnish you only first class, live trees and plants, we cannot assume any responsibility for the life of the stock after it leaves our Nursery, for then the care of it is no longer in our hands. The success of all plants is directly dependent on the weather, rainfall and care given by the purchaser, and these are all conditions over which we have no control.

Non-Warranty: We give no warranty either expressed or implied as to the description, quality or productiveness or any other matter of any Nursery Stock we sell, but we hold ourselves in readiness on proper proof, to replace free of charge any stock that may prove untrue to label or we will refund the purchase price. We are liable at no time for more than the original price paid.

Prices subject to change without notice.

MAIL ORDERS

Whether you come to the Nursery for your order or send it for shipment, you can always be sure of our most courteous and careful attention.

All orders should be accompanied by cash, or we can ship C. O. D. if you prefer. Cash, however, saves you the C. O. D. collection fee.

Orders for small plants can be sent by mail, but such items as Evergreens and Trees are too large for mail shipments and they are sent express or freight.

In figuring postage, you should add 15c to a \$1.00 order, 20c to a \$2.00 order and 30c to orders over \$2.00. Be sure to add the sales tax to your remittance if you live in Ohio.

Farmers and fruit growers are not required to pay sales tax on orders of Fruit Trees or Berry Plants, which are purchased for the purpose of producing fruit for market.

All express and freight shipments are sent with transportation charges collect.

THE BEST IN FRUIT TREES

When you buy our Fruit Trees, you get sturdy, perfect trees, the very best that money can buy, yet the prices are always reasonable. We propagate by budding on whole root seedlings, which is the best of all methods. Our buds are always carefully selected from bearing trees of outstanding merits, some of them being from the orchards of the Ohio Experiment Station. This is your assurance that our trees are pure and of the best strains.

Well cared for in the Nursery, the trees are thrifty and well rooted. We dig them carefully running the digger very deep so that we get all the feeding and fibrous roots and you know the trees can grow for you.

The laws of nature make trees bear better in groups so plant more than one variety of each fruit so they may cross-pollinate.

Varieties which are preceded by a star thus (*) have been tried and tested until we are certain they will please our customers. Those starred varieties will give you satisfaction, as they are the best that can be had. Buy them with confidence.

Number of Trees or Plants for an Acre of Ground Set at Regular Distances Apart

Feet		Feet	
1 by 1.....	43560	5 by 5.....	1742
2 by 1.....	21780	6 by 6.....	1210
2 by 2.....	10890	8 by 8.....	680
3 by 1.....	14520	10 by 10.....	435
3 by 3.....	4840	16 by 16.....	170
4 by 1.....	10890	20 by 20.....	109
4 by 2.....	5445	25 by 25.....	70
4 by 4.....	2725	30 by 30.....	48
5 by 1.....	8712	35 by 35.....	35
5 by 3.....	2904	40 by 40.....	27
5 by 4.....	2178	50 by 50.....	18

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.

APPLE

Our trees grow rapidly, bear young, and produce heavily. A careful selection of varieties will give you superior fruit all summer, fall and winter.

SHADE TREES

The size of all trees is given by height except where the word caliper is inserted before the size. The caliper of a tree is the thickness of the trunk at the ground line. Our Shade and Flowering trees are splendid in both "top and root" growth, having been transplanted frequently and given ample space in which to develop.

EVERGREENS

Our fields are filled with beautiful varieties of Evergreens giving you an opportunity to select just the type of trees most suitable for your planting. We will be glad to help you by offering suggestions for their proper arrangement.

Our Evergreens are sheared often to develop shapely tops and are always dug with a ball of earth, which is the only safe way to transplant them.
